

Technical Days of DORNA Project

6, 7 and 8 October 2011 Museo do Pobo Galego - Auditorium (Santiago de Compostela)

DORNA Project is focused on developing, from the perspective of a sustainable economic growth and cultural diversity, the preservation and recovery of the traditional nautical heritage.

DORNA Project, Spanish acronym for Organized and Sustainable Development in the Atlantic Northwest, co-funded by the European Union in the framework of the Atlantic Area Transnational Cooperation Programme, ends its implementation period on the 31st of October 2011.

Three days of working-sessions are foreseen to announce the project results and launch their implementation.

Besides the announcement of the project results, these Technical Days are aimed at establishing a network in the Atlantic Area, guaranteeing the transfer of the Project results.

6th of October: Technical Conference. "The wooden shipbuilding in the European Atlantic Area" (open to the public). It will analyse the situation of the wooden shipbuilding in the countries of the Atlantic Area (Ireland, UK, France, Spain and Portugal), the running projects and the future prospects. A section will be focussed on assessing the situation of wooden shipbuilding training at all levels.

7th of October: Presentation day for the results and Closing day of DORNA Project (open to the public). The project results will be presented.

8th of October: Debate day and proposal to create a European permanent collaboration network for wooden shipbuilding (only for partners of the Project)
